Airline Oils

High Quality Airline & Pneumatic Tool Lubricants

Product Code: AN0, AN1

Product Description

Cages Airline oil and Airline Food Safe are pneumatic tool lubricants applied via the compressed air supply. Both these products are based on highly refined mineral oils and exhibit good oxidation resistance, rust inhibition and multi-metal compatibility along with excellent hydrolytic stability and demulsibility.

Applications

Cages Airline Oil is suitable for use in lubricator bottles on compressed air system. It mists easily in the airline giving efficient lubrication in the air tool system. Cages Airline Oil (Food Safe) is a colourless, odourless and tasteless food safe mineral oil designed for use in airline lubricators providing lubrication in food production environments where air driven equipment is commonly used for mechanical handling. It is suitable for use where incidental contact between the lubricant and foodstuffs may occur.

Typical Test Data

	AN0 Airline Oil	AN1 Airline Oil (Food Safe)
ISO Viscosity Classification	22	15
Density @ 15°C	0.87	0.85
K.V. @ 40°C (cSt)	22	1.5
K.V. @ 100°C (cSt)	4.4	3.2
Flash Point (°C)	205	145

Availability

Cages Airline Oils are available in bulk, 1000 litres IBCs, 205 litre barrels, 25 litre drums, 5 litre and 1 litre plastic bottles.

Storage

Barrels of lubricant should always be stored in such a way that will prevent the ingress of water when stored in the open.

Health and Safety

Please refer to the relevant Health and Safety Data Sheet, a copy of which is freely available to all our customers.

Data represented is typical of that obtained with normal production tolerances and does not constitute a specification. The policy of Cages is one of continual improvement; we therefore reserve the right to change specification without notice.
